Software Developer | Java | Spring Boot | Angular | AWS

## OBJECTIVE

Motivated and detail-oriented Software Developer with hands-on experience in Java, Spring Boot, Angular, MySQL, and RESTful API development. Skilled in building scalable web applications and full-stack solutions. Seeking a challenging Software Engineer/Java Developer position where I can contribute my technical expertise, problem-solving abilities, and passion for developing high-quality software solutions while continuing to grow professionally.

## TECHNICAL SKILLS

|                  |                                                  |
|------------------|--------------------------------------------------|
| Languages        | Java, C, TypeScript, JavaScript                  |
| Databases        | MySQL, MongoDB                                   |
| Frameworks       | Hibernate, Spring Boot, Angular                  |
| Deployment Tools | GitHub Actions, Docker, Kubernetes, GitLab CI/CD |
| Process          | Jira, ITIL, GitHub, GitLab                       |

## PROFESSIONAL EXPERIENCE

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |                          |
